The #1 And #2
Reasons Why
Consumers
Remain Loyal To
A Particular
Retail Brand

DETAILED

DESTINATION

DISTINCTIVE

UN-DUPLICATABLE

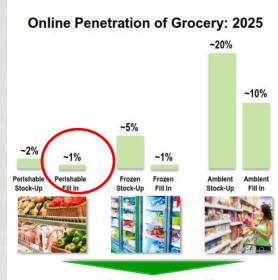

"Innovation distinguishes between a leader and a follower."

Steve Jobs

LIKELY OUTCOMES....

- Fresh will not be the primary target of on-line retail
- We cannot "save" ourselves into a competitive advantage
- Supermarkets will lose sales to e-commerce
- There will be multi-faceted consumer wants
- There will be a convergence of low tech and high tech in successful formats
- Not all banners will survive
- There will be multi channel formats from value to indulgence, but they won't look like today's stores

10.4% Overall

We go to stores to be inspired!

WHAT WE KNOW....

- 93% of retailers say labor is getting more expensive
- 83.4% cost of construction materials has increased
- 71.7% cost of construction labor has increased
- Supermarket construction costs avg. \$49.69 SF
- Interior lighting \$3.21 SF

- LED now used by over 100% of retailers (83% all retailers polled)

FMI STORE FACTS

\$142.57

The total store cost varies widely based on size as well as other factors such as format, amount of foodservice equipment, and so on.

Normalized to a cost per square foot (in other words, the total new store cost divided by the number of square feet), companies spent a median of \$142.57 per square foot including structural, equipment and décor.

Median new store size: 50,000 square feet

45.2%: New store size is about the same as stores built 5 years ago

28.6%: Build smaller stores than 5 years ago 26.2%: Build larger stores than 5 years ago

"ECONOMIC SOBRIETY"

Less Than Two Years
Before We See Sales
Declines in Categories!

"Retailers must move faster to deliver on people's expectations..."

"Most retailers have moved from 8 to 10 year remodel schedule...with retailers trying to extend this schedule due to remodel costs..."

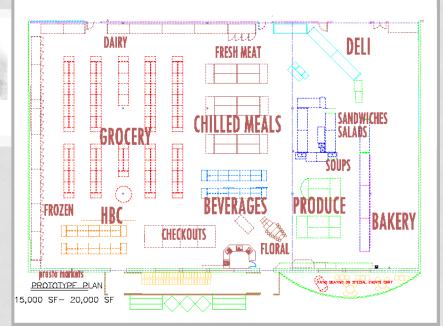

GLOBAL SHIFT TO SMALLER STORES

- In both urban and rural areas
- Across all channels (electronics, home stores, food stores, etc.)
- Can be more expensive to run (rent, labor, # of deliveries, etc)
- Select assortments; very local, no back rooms, dense pack out, frequent shoppers,

Don't just shrink big boxes...

Redesign

Flexible

Multifunctional

High destination

Fewer doors, narrower doors

Use vertical space

Different products, finishes, colors, shelving & lighting systems

Consumers can buy anything, at anytime, anywhere, and on any device.
Food is everywhere, prepared and delivered when, where, and how you want it.

"The fly-wheel affect we have created across Starbucks Rewards loyalty card, our mobile app, adjacent extension of our core brand beyond coffee And continually enhancing our store environment (wireless charging and Wi-Fi)365 days a year.

Howard Schultz, CEO Starbucks

Unfortunately, this new, highly competitive landscape has left most retailers with technology, personnel, and an organization designed for the past not the future.

ENDLESS AISLES.....

The ability to provide a shopper with any product they desire, even though not carried in-store....an endless assortment of products and pick up in-store or have it delivered....retailers have greater service, a connection, ensured availability, and in-stock position.

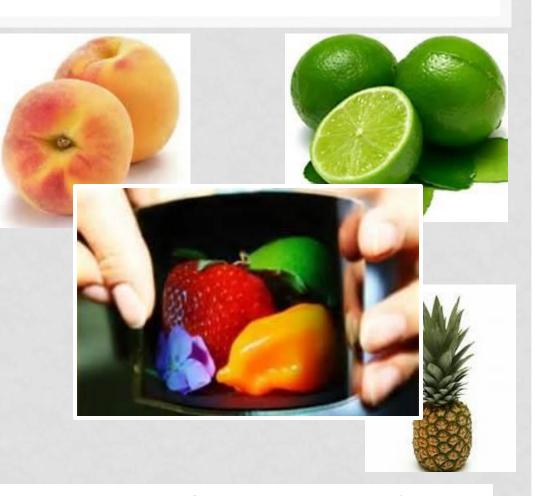

BLUR BETWEEN PHYSICAL AND DIGITAL...

Touch:

You will be able to touch through your phone.....

IBM Research think that in the next five years that our mobile devices will bring together virtual and real world experiences to not just shop, but feel the surface of produce (haptic feedback), and get feedback on data such as freshness or quality.....

IBM-five innovations that will change our lives within five years

Identified as the single greatest catalyst of change at retail

COMING ERA OF COGNITIVE SYSTEMS

Touch: You will be able to reach out and touch through your phone

Sight: A pixel will be worth a thousand words

Hearing: Computers will hear what matters

Taste: Digital taste buds will help you eat healthier

Smell: Computers will have a sense of smell

"One of the most intriguing aspects of this shift is our ability to give machines some of the capabilities of the right side of the human brain"

BUILDING FOR BOOMERS

PepsiCo's Center Human for Human Understanding

- 80 million of strong spending power
- "Digital immigrants" embrace technology
- Perceive themselves as 10 years younger than actual age
- Prefer an emotional connection
- They pull away from noisy, busy, cluttered stores
- They would love store lighting to be improved

"Local" and sustainable messages are broadly relevant across younger and older generations. Marketers who realize that such values are universal connective tissue across generations are more likely to be successful in building broad, intergenerational brands.

PERCENTAGE	AGE	HOW THEY FEEL		
62%	50+	Think today's advertising is "too weird" to resonate with them."		
44%	45-64	Feel increasingly ignored by marketers and advertisers		

ENGAGING WITH MILLENNIALS

- Consider them Gen Frugal
- They have GREAT filters (see what they want to see)
- Brand is not important, will only engage in what they care about
- They do not respond to marketing
- They have a trusted board of advisors-it's the universe!
- They are tech-dependent (way past savvy)-digital natives

To find out what customers wanted.....
Wegmans asked Twitter followers for suggestions before working with the culinary and nutrition teams to finalize the options.

INVOLVE MILLENNIALS

The high-tech expectations of the Millennial generation are changing the way software applications are built...

A mashup is an application developed by regular people – computer users -- rather than IT experts. They're simple and specific, built from components rather than scratch, a combination of already-existing content, applications and processes...

Change is the one constant Millennials expect. They operate "in 'fast-forward' mode," seeing the present and the future blend seamlessly.

Reason #1: They're more tech savvy than any previous generation.

Reason #2: They're an economical hire.

Reason #3: There are a whole lot of them.

Reason #4: They want to work.

Reason #5: They stay on top of emerging trends.

It's About Connecting, Communicating

&

Socializing

ALL-STAR FOOD TRENDS

- Demanding transparency in production, handling, business practices, local &authentic
- Service and self-service balance
- Women are big spenders-outspending men by \$14.31 per trip to supercenters and \$10.32 per trip in grocery stores; will control 2/3 of consumer wealth in next decade
- On-line drives in-store shopping-91% (1,027 respondents) have gone into a store because of on-line experience
- Customers want "ME" commerce, customized and individualized

Prepared foods purchases from all channels outpaces restaurant visits

BEYOND LIFESTYLE TO WHOLE LIVING

I don't want it fast.... I want it NOW...

- Health & wellness
- Convenience
- Artisan, hand crafted & sustainable
- Smaller footprints (or defined)
- Town center/near hubs (back to Main Street)
- Local history, local products, local architecture

THE BOTTOM LINE IN BUILDING COMPELLING FRESH FORMATS.....

Opening: November 2012 Selling Space: 2.500 qm Store Design: Inhouse

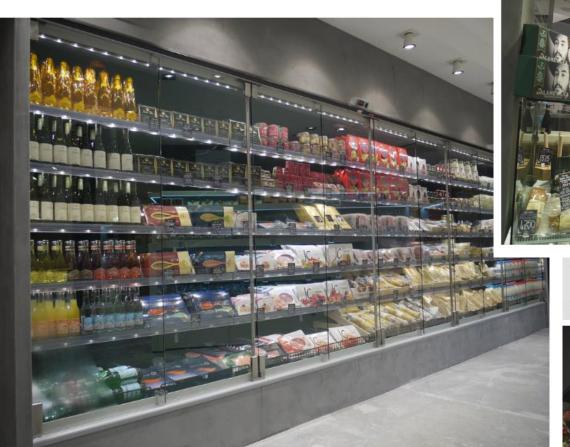

STYLIZED VALUE

THE SCIENCE.....

- Energy reduction goal of 50% compared to typical store refrigeration load (mostly achieved by putting doors on cases)
- Reduced refrigeration load needed to meet EPA limit for propane systems
- Receiving positive shopper comments ... energy and sustainability very important

DOORS ARE NOT FROM 1970'S

- No negative customer feedback
- 2. Fantastic lighting and merchandising
- 3. Superb product visibility
- 4. Improved product integrity/shelf life
- 5. Improved customer comfort
- 6. Improved refrigeration performance
- 7. Improved HVAC performance

Improved Visibility and Lower Costs from New Freezer Designs

Greater use of glass and light in frozen sections

CUSTOMERS KNOW REFRIGERATION WORKS BETTER WITH DOORS.....

Big Y: absolutely no customer complaints, sales up slightly, warmer/comfortable aisles, two year payback;

John Pazahanick, VP Big Y

Merchandisers would really like:
No frames at all, all glass, integral LED,
no fogging-EVER!

STUNNING MERCHANDISING

LIGHT SHAPES OUR WORLD WITHOUT LIGHT WE WOULD NOT SEE FORM, COLOR OR TEXTURE

EARLY VERSIONS DID US NO FAVORS

Installed wrong direction

Exposed wiring

Uneven lighting

Installed with tape

REALLY-SCIENCE: LED CASE LIGHTING PROLONGS SHELF LIFE

"LED is NOT a replacement for today's lighting. It is a digital technology with potential to radically boost how displays perform, interact and are controlled"

LEDs contain

No mercury

No radiation

No UV

Study conducted by Kansas State Univ. and Hussmann indicated a significant improvement in shelf life of meat under LED lights; internal temp of meat remained cooler

The ONLY choice for lighting food:

- LED specifically for meat, produce, cheese, etc. with tailored spectrum for best contrast and merchandising
- Correct lumen output, CCT and controls for each product application
- Correct beam angles and glare controls
- Coordinated lighting designs that start from the case and go to the ceiling
- First payback on LED systems is enhanced visual merchandising

SCIENTIFIC STUDIES: BEST LIGHTING FOR PRODUCE.....

Perception of color is very cultural

Naturalness & aesthetics two important aspects of color rendering

Study asked to identify the preferred conditions when produce appeared most natural, while "warmer" was stated....4000K was identified as most natural

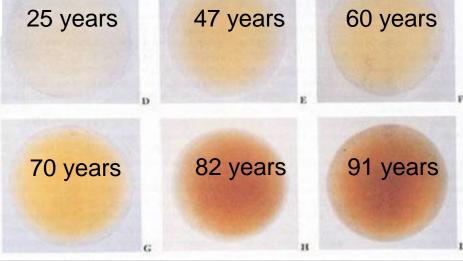

Age of consumer (or decision maker) Determines how product is viewed

BOOMERS WANT US TO FIX OUR LIGHTING.....

AGING CONSUMERS

Reduced sight

Reduced alertness

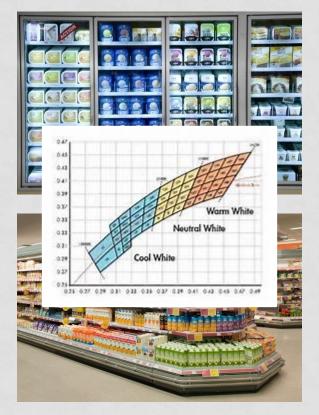

Disturbed mood

COLOR TEMPERATURE

Colour Temperature

5000K

4000K

- > System intelligence

Cost of Ownership

- > Low heat emission
- > Over 50,000 hr. lifetime
- No re-lamping maintenance/labor
- ➤ No storage of bulbs/parts

Why is LED lighting the choice of retailers & store designers?

Experience: brand statement

Atmosphere: comfort

Spatial/architectural: stability, safety

Flow: convenience

Brand Promise: value and service

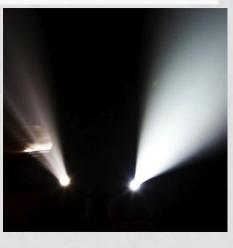

LED (R)EVOLUTION NO LONGER JUST AN ENERGY DECISION

✓ Color Consistency

✓ Color Rendering

✓ Lifetime / Maintenance

✓ Output / Versatility

- Controllable fixtures and systems
- "Human Centric Lighting"
- 100% retailers surveyed spec LED

"The right contrast and correct lighting is an unarguable merchandising advantage"

Kathy Loftus, Global Leader, Whole Foods

LIGHTING IS A BRAND AND MERCHANDISING DECISION

- 1. Establish and support the retailer's brand statement.
- 2. The level of the illumination and the quality of the fixtures signals whether a store is geared for budget-conscious consumers or looking to attract a more upscale clientele.
- 3. Create a signature appearance throughout the store.
- 4. Establish a visually comfortable environment.
- 5. Provide visual traffic queues to direct the shopper to "must see" items, and high profit areas.
- 6. Print on packaging, such as nutrition labels and ingredients, should be easy to read.
- 7. Reduce/minimize heat from lighting fixtures; especially in areas with perishables, to protect products (eliminate ultraviolet rays).
- 8. Portray colors accurately.
- 9. Lower energy costs.
- 10. Provide consistency, reliability, low maintenance costs and inventory.

api (+) store design & architects

VOLUTION-

"Shoppers are demanding more sophisticated shopping environments, interactive displays, and more lifestyle driven formats"

LED performance has improved exponentially

Advancements in low power LED's requires less heat sinking, allows for slimmer fixtures

Adoption has been faster than predicted

Cost has dropped dramatically

ransformational Technology

Design lighting systems

BUT WE WANT MORE.....

Wal-Mart Confirms Higher Retail Sales in Daylit Stores

"Wal-Mart claims energy savings from drawing natural light through the skylights. But 'something else has gotten the corporation's attention', says the [Rocky Mountain] Institute. In every Wal-Mart store, each cash register is connected in real time back to headquarters in Bentonville, Ark. According to Tom Scay, who was then the company's vice president for real estate, sales were 'significantly higher' in those departments in the daylit half of the store, and they were also higher there than in the same departments at other stores. Employees in the half without daylighting continue to try to have their departments move to the daylit side."

Maybe Roof Top Produce

Two Ways to Go Green

1. Renewable Energy - Solar, Wind, Geo-Thermal (Expensive)

2. Energy Efficiency - Reduce the use of electricity

A well-designed daylit building is estimated to reduce lighting energy use from 50% to as much as 80% (refer to Sustainable Building Technical Manual, chapter IV.7 page 90.)

That's a 100% savings for energy not used

SMART LIGHTING.....GET FREE INFORMATION FROM YOUR LIGHTING

Interaction between consumer smartphone and lighting system directs consumer to items in store

ByteLight INDOOR LOCATION-BASED SOFTWARE

How it Works

ByteLight software leverages energy efficient LED lighting to provide a best-in-class indoor location solution that is accurate, fast, and works on any mobile device.

What You Need

The best part is that we're using an infrastructure that needs to be there anyways — lighting. All you need are LED lights that have been enabled by ByteLight software.

True Color Sensor systems that measure the color of objects and adjust to specifications

Lightfair 2012 LED light color regulation.mp4

Color tunable, adjustable beam angle, modular and stunning CRI

ACTIVE DYNAMIC CONTROL LIGHTING....

- Control light effects in 4" increments of each shelf's LED
- Adjustable from 2800k-7000k
- Optimum use throughout store's entire life cycle

- Library of functions for ideal product presentations
- Each product having its own color and ambiance file
- Full visual of every angle of packaging
- Retailer (and CPG) specific solutions

BUILDING OPTIMIZING SYSTEMS (BOS)

EXPERIENCE MANAGEMENT...

Wirelessly control the shopping experience & environment,

The trick isn't to control the individual systems; its reading all the data in an open format that allows an analyst the ability to make intelligent decisions. Run your building as one entity, not as a bunch of individual systems.

RDM - 100% open

Standard web-portal No proprietary software visual merchandising excitement, space, labor and profits, the brand promise, digital marketing..

TECHNOLOGY REVOLUTIONIZING DEVELOPMENT & DESIGN

3-D model of the Lunar Lion spacecraft

Penn State freshman and aerospace engineering majors design and create a robotic spacecraft that could land on the Moon by 2015.

"Digital fabrication means a cultural revolution that says if you can think of it, you can draw it, and if you can draw it, you can make it."—Richard Devon, professor of engineering design

...when asked whether such a product will be made using rapid 3-D prototyping, Jantsch was sure it would. "There's no doubt in my mind," he says.

"Anyone who doesn't develop this way will be left behind."

SCIENCE: TECHNOLOGIES TO INVEST IN PlanetRetail

The two largest number of customer complaints are pricing problems and lack of service staff

1. Self-Service Checkouts:

New technologies change the game

2. Customer Facing Technologies:

Enabler for a new generation of pinpoint marketing

3. Price optimisation:

Higher margins without increased turnover

4. RFID (Radio-Frequency Identification):

Back from the brink

5. Warehouse Automation:

Machinery picks and packs more precisely

Over riding trends:

- Optimization through data analysis
- Self-service and automation
- Merging of online and offline marketing
- The end of "made-in-China" era

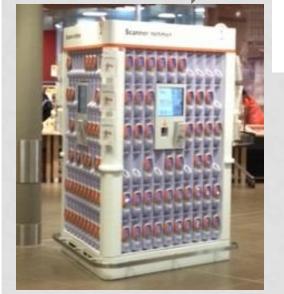

RENAISSANCE OF SELF SCANNING MOBILE DEVICES

We have to take seconds out of this process thousands of times a week

Check-Out, 2 min 55 sec, 23%

Navigation, 2min 39 sec, 21% Perimeter Shopping, omin 5 sec, 39%

Center Store Shopping 2min 16 sec, 18%

Metro Group in Germany was the world's first retailer testing self-scanning with mobile phones. In the project in Real's Future Store in Tönisvorst, Germany, Metro Group will soon test self-scanning with IPhones.

THE TECHNOLOGY HAS IMPROVED SIGNIFICANTLY

... and self-scanning with Re-vision and Motorola. The photos from the concept store Carrel planet in Vénissieux, France, show the new colour guidance system through the different fi of self-service checkouts.

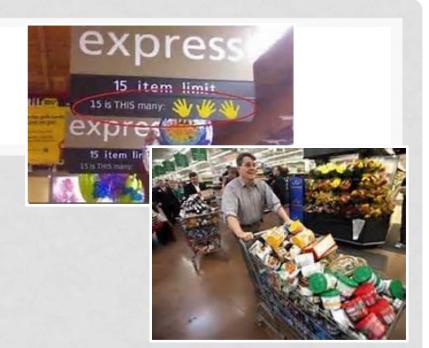

In Hebron, Kentucky, Kroger started the world's first test of a fully automated tunnel scanner in a real store.

THE NEW BENCHMARKS IN CUSTOMER SERVICE

- Kroger Co. is winning the war against lengthy checkout lines with a powerful weapon: infrared cameras long used by the military and lawenforcement to track people.
- These cameras, which detect body heat, sit at the entrances and above cash registers at most of Kroger's roughly 2,400 stores. Paired with in-house software that determines the number of lanes that need to be open, the technology has reduced the customer's average wait time to 26 seconds. That compares with an average of four minutes before Kroger began installing the cameras.
- "The technology enabled us to execute at the front of the store without that additional (labor) expense," said Marnette Perry, senior vice president of retail operations for Kroger.
- Reducing wait times is becoming a top priority for retailers....Battling both online rivals that offer athome convenience and intensifying competition among fellow brick-and-mortar outlets, many companies see enhancing the shopping experience as a way to build loyalty.

Kroger uses infra-red sensors in cameras for queue management

WATCH FOR CUSTOMER MONITORING TECHNOLOGY AS PART OF "BIG DATA" TREND

GROUND PENETRATING IMAGING RADAR

- Queuing
- Behavior intelligence
- Traffic patterning
- Intelligent resets
- Labor deployment
- Maximize profits per SF

In a typical store 30% of the square footage Is under utilized

MARKETHUB

We are still leaving millions on the table

Maximise Sales & Pricing Profitability through data and price elasticity analytics

Real Time Competitor Pricing Data

Zero Maintenance Dynamic Price Changes

Our mission is to make our customers more profitable in real time

More than just a price tag

E-INK ENERGY-HARVESTING SELF POWERED

- More profitability in real time
- Link physical store to on-line offerings
- Automate in-store experience as well as improve operating model

iMAGOTAG

The convergence of big data and hardware

"If you make 10,000 price changes and you have 1,000 stores, you have 10 million instances," says Chris Donnelly, a managing director of Accenture who specializes in retail consulting. "Even if you get the right label in the right place 99 percent of the time, that leaves 100,000 misplaced labels."

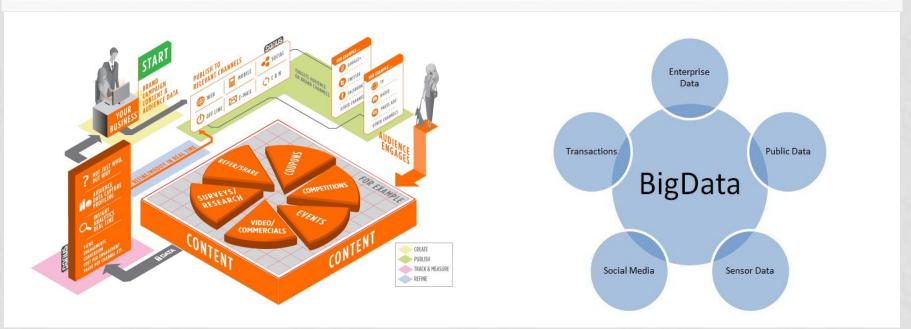

Change is coming to Retail Pricing

More Data – More Frequent

SEAMLESS RETAILING-TABLE STAKES DEMANDED BY THE CONSUMER

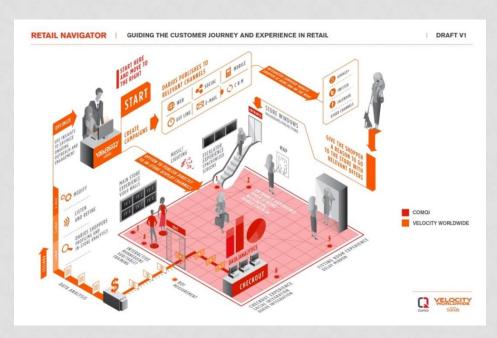

BIG DATA is the new oil....it's like gold—Most of the technology and data has been on the back-end of stores (supply chain, inventory) and over the last few years it has started to explode into the front of the store (think digital signage, traffic analysis, customer tracking, restocking).

BIG DATA mining and analysis will continue to drive dollars by improving customer service and targeted advertising/offers that become more and more critical for future success.

CONVERGING ON-LINE AND BRICKS AND MORTAR EXPERIENCE

Sales influenced by mobile phone will hit \$ 700B in US by 2016

Create relevant communication

Publish to social media and traditional marketing

See ALL interactions from your customers

Singularity Engagement

Digital price displays change in an instant responding to the customer's mobile phone

Points of interest

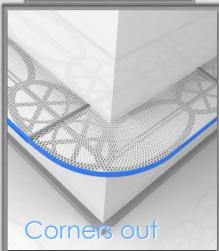

CONVERGENCE OF ART & SCIENCE

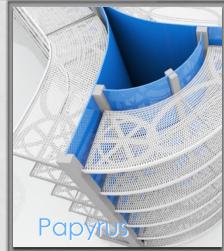

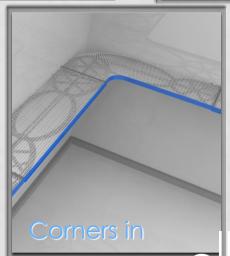

Copyright 2012 Techni LLC. - Patent Pending

WHO WILL MAINTAIN THESE FACILITIES AND SYSTEMS

- Aging technicians (avg. age over 55)
- We cannot manage a bunch of disparate systems
- Who is training the new technicians
- Core competencies very different from the past; the convergence of the facilities and IT guy.....

New generation of specialists expects hand held -"there's an app for that", real time information, diagnostics and corrective actions with fully integrated systems.

Kathy Loftus, Sustainable Engineering, Whole Foods

THE NEW BLUEPRINT

"Any shopper understanding" - shopper needs intersect with company, brand, banner strategies and tactics

Cross organizational understanding- marketing, IT, merchandising, engineering, operations, facilities, and supply chain

Organizational design – processes, analytics, and training

Multi-faceted – beyond sales, brand and supplychain collaboration

Technology and infrastructure integrated in-store - which enables Omni-channel shopping experience, e-Commerce, social, mobile and digital solutions and communication, access to data, analytics, reporting and solutions

Measure - Manage - Maintain - Manipulate

WE CANNOT PREDICT THE FUTURE, BUT WE CAN BUILD IT!

"Building better stores through collaboration"

- Winners will:
 - -Successfully differentiate from the other formats and from like-formats
 - Redefine the end-to-end shopping experience
 - Embrace and lead with technology
 - -Participate in the **transition to online purchasing** (one way or another)

THANK YOU!
