

## Manufacturer/Retailer Exchange Companies

### **A Cook Associates, Inc.**

A. Cook Associates, Inc. provides facilities management software for supermarket chains. Our software integrates maintenance management, indirect purchasing, project management, and inventory control including refrigerant tracking, in a web-based, enterprise process management solution. Since 1989, as a result of continuous development, we have helped lead the industry in engineering process improvement.

### **Above Lights**

Above Lights was founded by individuals with a vision to make LEDs a viable, energy efficient lighting alternative. Our staff is composed of professional engineers with extensive background in optoelectronics, material science, thermal management and power driver circuitry. Our combined experience in these fields, give us the leading edge over our competition in creating solutions with the highest level of performance.

### **Advanced Refrigeration Systems**

Advanced Refrigeration Systems is an industry-leading global manufacturer of custom energy-efficient, variable speed refrigeration compressors systems for retail grocery, distribution warehouse, cold storage and food processing facilities. Advanced Refrigeration Systems services and design features include: complete design and engineering to meet exact customer product load specifications, fully welded/powder coated steel frame construction, top quality components and superior system control strategies with enhanced compressor protection features.

### **Aeroflex USA, Inc.**

Aeroflex manufactures EPDM closed-cell elastomeric refrigeration, HVAC and plumbing system insulation and installation accessories. Best energy savings, best UV resistance, best moisture resistance, best mold/mildew resistance, no stress corrosion cracking contribution, thick insulation walls, small and large inside diameters. Brands: Aerocel, SaniGuard, Aerofit, Aerofix, Aero seal, Cel-Link II.

### **AHT**

AHT is an innovative global technology leader in the field of plug-in refrigeration and freezing solutions. The company's focus is on high quality, low to no maintenance, environmentally friendly flexible systems that drive sales. AHT offers some of the most energy-efficient and eco-friendly solutions, including R290 as an option.

# Energy & Store Development Conference E+SD 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **Air Row Fan Company**

The new "Direct Air" fan from Air-RowFans is the newest and most versatile solution for grocery store air distribution challenges. The DA-248 can be installed virtually anywhere along the store's ductwork. It has been highly effective in store vestibule entrances, warming and drying the area during cold and inclement weather, and countering the warm air against the cases in the refrigerated aisles.

## **Airius, LLC**

Airius' small energy-efficient air turbines improve comfort and save on HVAC energy. By capturing the warm ceiling air and gently mixing with the cooler air below, the fans mitigate hot and cold spots, reduce door condensation, keep floors dry and improve shopper comfort.

## **Amerlux**

Amerlux manufactures architectural-grade, energy-efficient lighting solutions for supermarkets. Our products utilize the latest technology in LED, HID, and linear available today that when combined with our luminaire and optic design, provides just the right light for the application with the least energy consumed. Product range spans track, downlights, multiples, pendants, linear, and specialty.

## **Anthony International**

Anthony is the world's largest manufacturer of glass doors and frames for industrial and commercial refrigeration.

## **Arkema, Inc.**

Arkema Inc. is a leading manufacturer of HCFCs and HFCs as well as an innovator of next-generation low-GWP refrigerants. Arkema's Forane® refrigerants are used wherever cooling or freezing applications are required, including appliances, automotive, food processing, industrial refrigeration, and supermarkets. Worldwide, Arkema has annual sales over USD \$7 billion.

## **Arneg, USA**

Arneg designs, manufactures and services premium refrigerated display cases and cabinets for the retail food industry. Our commercial refrigeration equipment is used in supermarkets, hypermarkets, grocery shops, convenience and specialty stores, drug stores, cafeterias and restaurants to preserve, store and display temperature-sensitive, frozen, and chilled food products.

## **Baltimore Aircoil Company**

For over seven decades Baltimore Aircoil Company has been dedicated to the development of innovative, cost-effective heat transfer solutions for its customers. This has established BAC as the global leader of factory-assembled evaporative heat rejection and thermal storage equipment.

# Energy & Store Development Conference E+SD 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **Baseline**

Baseline provides consulting services in the areas of sustainability, energy-efficiency project development, facility-related new and remodel construction commissioning, existing facility NegaWatt re-commissioning, refrigeration and control system engineering design, and general engineering, to the supermarket, distribution, chain retail, commercial property, food service, and hospitality industries.

## **Benchmark Group**

Benchmark Group is an alliance of design professionals and support staff, serving retail, restaurant and commercial clients. Our alliance members are licensed in all 50 states, the District of Columbia, and Puerto Rico. We serve your needs by providing Architecture, Electrical Engineering, Mechanical Engineering, Refrigeration Engineering, Fire Protection Engineering, Construction Management and Energy Services.

## **BITZER US, Inc.**

BITZER is a global leader in Semi-Hermetic Reciprocating and Screw Compressors for Supermarket refrigeration systems. BITZER's US manufacturing plant near Atlanta, GA builds the ECOLINE Recip, an optimized version of our popular OCTAGON series for use with R134a, and our VARISPEED Recip series features factory mounted and programmed variable frequency drives and provides 30% more capacity at full speed and offers significantly less energy consumption at part load. In addition, our OCTAGON CO2 Recip series includes a wide array of capacities for both subcritical and transcritical CO2 applications. We also manufacture ASME certified Shell & Tube Heat Exchangers and Receivers. Contact us for more information about our "Green" compressors and market leading energy efficiencies.

## **BRISTOLITE DAYLIGHTING SYSTEMS**

Bristolite Daylighting Systems is a large skylight manufacturer with complete daylight design services, 40 years of experience, and nine daylighting products. No one skylight is optimum for all locations. There are three manufacturing plants across the US to reduce freight 60%. We have over 50 National Daylighting Accounts.

## **BRR Architecture**

BRR Architecture is a preeminent national architectural firm serving large retailers and successful grocers since 1963. Having completed more than 5000 grocery projects with nine offices across the country, BRR is registered in all 50 states and possesses strong working experience with more than 3000 jurisdictions.

# Energy & Store Development Conference **E+SD** 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **Carel**

CAREL, a recognized global leader of Refrigeration, Air-Conditioning and Humidification controls, provides total store integration and optimization solutions for the food retail industry. CAREL's innovative technology and customizable system solutions offer operational benefits to small and large retail uses, for both traditional and natural refrigerants systems.

## **Carlyle Compressors**

Carlyle compressors can be found around the world - from the first nuclear sub to your grocer's freezer. That's because when it comes to refrigeration and air conditioning, Carlyle builds the world's most reliable compressors.

## **Carnot Refrigeration Inc.**

Carnot Refrigeration is a leader in the manufacture and refurbishing of customized industrial and commercial refrigeration equipment. Applying eco-efficient methods, Carnot offers a wide range of solutions tailored to your needs. With Carnot Refrigeration you will have high quality industrial skids, low cost and green solutions for your refrigeration equipment.

## **Commercial Refrigerator Door Company**

Family owned and operated since 1975, Commercial Refrigerator Door Company offers a full line of STYLELINE products, including heated and energy-free glass door and frame systems for walk-in coolers and freezers and a wide range of shelving and merchandising accessories. STYLELINE sets the industry standard for design innovation, quality and reliability. Each system is made-to-order and manufactured to exact specifications.

## **Concept Store Fixtures**

Concept Store Fixtures is a manufacturer and installer of replacement parts for commercial refrigerators (reskinning) and door retrofits.

## **Consolidated Energy Solutions, Inc.**

CES is featuring its ground-breaking Multi-Path HVAC dehumidification solution. This innovative system features a patented air damper/sequencing design that adjusts dynamically across the full operational range from single path to dual path. The result is improved control of constantly fluctuating load conditions and humidity levels, with a significant reduction in HVAC energy costs.

Energy & Store  
Development Conference  
**E+SD** 2014

St. Louis Union Station Hotel

#### **ControlTec**

ControlTec is an energy management company for the supermarket industry. ControlTec's main focus is to provide technologically advanced energy-saving products that will allow the supermarket to capture optimal savings and have the ability to monitor and verify that savings for sustainable utility incentives and carbon footprint tracking.

#### **CRAIGG mfg**

Craig for 23 years has mastered under-the-floor refrigeration piping with our "in-floor Access Enclosures". Craig's enclosures can adapt to every installation, whether it's new construction or a remodel. We proved that we can address any situation associated with handling underfloor piping and controls. With our vast selection of sizes, models and cover styles, there is one that will work in your store. WHAT'S NEW? We expanded our selection by adding "variations," a selection of hybrid units that you requested.

#### **CrownTonka Walk-Ins**

CrownTonka is an industry leader in the manufacturing of quality, custom walk-in coolers and freezers serving the Supermarket, Convenience Store, Cold Storage Warehouse and Environmental industries since 1963. CrownTonka manufactures and ship panels from 4 panel plants strategically located in the USA. CrownTonka manufactures wood framed and high-density foam rail panels from 3.5" to 6", providing a wide range of cold storage options to meet your exact requirements. CrownTonka also manufactures a wide range of walk-in Replacement Doors and Sliding Doors. Quality, Service and Locations That Set Industry Standards!

#### **CTA Architects Engineers**

From inception CTA was based on integrated design and the combination of Engineering and Architectural Services. Today we still believe in that tenet, and as building design and engineering systems become more sophisticated, we continue to add specialists to our staff that allow us to provide a complete, integrated package of services to our clients. Our current staff of over 390 members offers a multitude of "in-house" consulting architectural and engineering services.

#### **Danfoss**

Danfoss is a leading supplier of compressors and automated solutions to the refrigeration and air conditioning industry. Our product range is among the most complete in the world. With our leading-edge technology that includes an extensive history with CO2 and Hydrocarbons, take control of energy-consuming utilities and get ready for sustainable energy savings that will benefit your bottom line as well as the environment.

# Energy & Store Development Conference E+SD 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **DEEM, LLC**

DEEM offers solutions for businesses and new construction: Piping installation/service, Boiler service work, Plumbing installation/service, Refrigeration installation/service, Electrical/data work, HVAC installation/service, Preventative and full service maintenance programs, Service/Retrofits New construction, Retail/Commercial/Industrial Institutional Facilities.

## **DuPont**

GWP regulation will start in the US within the next two years. Prepare for the future with DuPont™ Opteon®, a suite of low GWP, HFO products from DuPont. Led by Opteon® XP40, scheduled for US commercialization in 2015, HFO products directly replace 400-series blends with minimal equipment changes.

## **Dwyer Engineering**

Dwyer Engineering is a MPEER, mechanical, plumbing, electrical and refrigeration engineering firm that specializes in cost-effective solutions to energy issues. Dwyer Engineering offers energy modeling that can assist with energy design decisions, which is a valuable tool when dealing with the complex interactions of the various mechanical, electrical and refrigeration systems within a grocery store. Dwyer Engineering offers energy and water usage audits, which can save money on utility costs.

## **E. Gartland & Associates LLC**

Quality representation of refrigeration products. Consultant to retailers on refrigerant-related issues including market dynamics, selection, leak detection, regulations and compliance. Reps for: Bacharach, RefPlus, Zero-Zone.

## **Eaton's B-Line Business**

Eaton's B-Line Business is a global manufacturer of support systems and enclosure solutions for engineered facility subsystem applications. Our solutions and services are designed to help improve efficiency and safety during installation with maximum return on investment. With operations in the United States, Canada, Europe, Asia, Australia and the Middle East, we are poised to support customers globally with product solutions for the commercial, industrial, oil and gas, mining, data centers, utility and OEM markets.

## **ebm-papst Inc.**

Headquartered in Farmington, Conn., ebm-papst is the world's leading source for engineered air movement products, providing "total customized solutions." Our professional teams solve heating, cooling and ventilation challenges for industries and applications including ventilation and air conditioning, refrigeration, heating, household appliances, IT and telecom, industrial, transportation and more.

# Energy & Store Development Conference E+SD 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **Emerson Climate Technologies**

Emerson Climate Technologies combines best-in-class technology with proven engineering, design, distribution, educational and monitoring services to provide customized, integrated climate-control solutions for customers worldwide.

## **Energy Advantage**

Energy Advantage represents a new experience in the energy management world. We help organizations meet complex energy management challenges with end-to-end integrated approaches that produce real results and impact the bottom line. We exceed a client's expectations by listening and understanding their needs and then implementing a customized solution that best delivers cost management, demand management, and technology for their organization.

## **Energy Squared**

Energy Squared, LLC, is a full-service consulting engineering firm that serves a variety of industries. Our company provides mechanical, electrical, refrigeration, energy management, plumbing and fire safety design engineering services. Our goal is to continuously seek cost-effective and energy-efficient solutions and designs, often challenging conventional solutions and bringing innovative options to our clients.

## **Enreps LLC**

Enreps, LLC provides over 12 years of experience for Commissioning and Energy Audit services for refrigeration and HVAC. We developed Cloud Commissioning Software for quick turnaround and efficiency of reports. We provide results, reduce construction costs, deliver a complete, efficient and fully operational building, and reduce operations /maintenance costs and downtime.

## **EPA**

The U.S. EPA's mission is to protect human health and the environment. Three EPA programs that impact food retailers will be featured during the MREs: GreenChill; the HCFC Phaseout program; and the Significant New Alternative Policy (SNAP) program.

## **Ecova**

The U.S. EPA's mission is to protect human health and the environment. Three EPA programs that impact food retailers will be featured during the MREs: GreenChill; the HCFC Phaseout program; and the Significant New Alternative Policy (SNAP) program.

# Energy & Store Development Conference E+SD 2014

St. Louis Union Station Hotel

## **FacilitySource**

FacilitySource offers companies with large, dispersed real estate portfolios an innovative, high quality alternative to traditional facility support solutions. FacilitySource encompasses the very best in real-time facility support software as well as robust transaction centers for customer relations and service provider management. Our Integrated Facility Management approach is ideal for multi-unit operators looking to reduce costs and understand facility support trends. FacilitySource has been in business since 2001, operating under the name of FacilitySource since 2005. The company is a portfolio company of Warburg Pincus, the leading global private equity firm— [www.warburgpincus.com](http://www.warburgpincus.com).

## **FSI Coating Technologies, Inc.**

FSI Coating Technologies offers Anti-Fog polyester film with adhesive backing for interior side of freezer doors. Prevents fogging on glass doors that are part of low energy freezer systems.

## **GF Piping Systems**

GF Piping Systems is the manufacturer of COOL-FIT ABS, COOL-FIT ABS Lite, COOL-FIT ABS Plus, ecoFIT and iFIT piping systems for your propylene glycol systems and chilled water systems.

## **GI Energy**

Founded in 2001, GI Energy has grown to become the UK market leader in large-scale ground source solutions. We are an emerging force for cutting-edge ground source systems in the US since 2011 with the added offering of combined heat and power (CHP). Our innovative approach to renewable energy technology and funding solutions, along with our comprehensive design-build-operate-maintain service, has made GI Energy a trusted international brand. These strengths have allowed us to form strong relationships with key customers including Sainsbury's, Walgreens, Skanska and Land Securities.

## **Green Building Initiative**

The Green Building Initiative™ is a nonprofit organization and American National Standards Institute (ANSI) Standards Developer dedicated to accelerating the adoption of practical green building approaches for commercial construction. These approaches also help reduce building operating expenses including energy costs. Founded in 2004, the organization is the sole U.S. provider of the Green Globes® building certification program, which is rapidly being adopted by the supermarket industry. Green Globes is ideal for retail environments due to its integration with the ENERGY STAR® program—which includes supermarkets as a building occupancy category. The Green Globes certification process also incorporates the EPA's GreenChill Store Certification Program for Food Retailers, which recognizes individual stores for using environmentally friendlier commercial refrigeration systems.

# Energy & Store Development Conference **E+SD** 2014

St. Louis Union Station Hotel

## **Groom Energy Solutions**

Groom Energy Solutions is a nationwide energy service company designing and installing energy-efficient building upgrades for commercial and industrial customers.

## **Heat Seal LLC**

Heat Seal manufactures supermarket packaging and food processing equipment. Their latest innovation is a new Energy Smart® Wrapper, an on-demand hand wrap machine that provides significant energy conservation. Field testing shows the wrapper reduces energy consumption by 80%. Savings have been confirmed by Southern California Edison – reports are available.

## **Heatcraft Worldwide Refrigeration**

Heatcraft Worldwide Refrigeration, a subsidiary of Lennox International, is a global leader in the commercial refrigeration industry serving over 70 countries worldwide, providing its customers with a wide range of innovative refrigeration solutions. Throughout North America, the company manufactures premier commercial refrigeration products under the BOHN™, Kysor/Warren, Larkin™, Climate Control™, Chandler™ and InterLink™ brands.

## **Henderson Engineers, Inc.**

Henderson Engineers provides mechanical, electrical, plumbing and refrigeration design services through its Kansas City headquarters and offices nationwide. Licensed in all 50 states, HEI has more than 500 employees including 150+ PEs and 100+ LEED Accredited Professionals. HEI's specialty services include acoustics, architectural lighting, commissioning, fire protection, security, technology and sustainability.

## **Hillphoenix**

Hillphoenix's mission is to provide fresh, innovative customer-centric solutions that help our customers stay relevant and competitively differentiated. Our vision inspires us to become the recognized global leader in creative, flexible and responsible innovations in retail refrigeration. Our values drive our restless spirit to deliver fresh thinking and responsible solutions.

## **Honeywell**

Honeywell Refrigerants provides a wide range of products from Genetron® R-22 alternatives, the energy saving benefits of Performax LT (407F), to next-generation Solstice™ low-global warming refrigerants. Our technical support is second to none and our mobile apps and training videos are available 24/7.

#### **Howe Corporation**

Howe Corporation manufactures 1000 through 4000 pound per day ENERGY STAR qualified flake ice machines, as well as models designed for use on subcritical and transcritical CO2 refrigeration systems, and also pumped CO2 secondary systems.

#### **Hussmann Corporation**

Hussmann collaborates with the food retail industry to identify products and services that enable food retailers to increase sales through merchandising solutions that attract shoppers to their stores and to reduce operating costs through energy efficient and performance solutions throughout the entire store footprint.

#### **KeepRite Refrigeration**

KeepRite Refrigeration is a leading North American manufacturer of commercial refrigeration equipment. This includes a complete lineup of unit coolers with patented SmartSpeed technology, condensing units with patent-pending Limitrol+, air-cooled condensers, Link/Link+ distributed systems, fluid coolers, air handlers, and specialty products including heat reclaim coils.

#### **K-FLEX USA**

K-FLEX USA is a leading manufacturer of elastomeric, closed cell insulation products that are easy to use and deliver reliable and lasting performance. Innovative and responsive to the market, K-Flex USA partners with our customers to provide solutions for demanding insulation applications.

#### **Kysor Panel Systems**

Kysor Panel Systems is a leading manufacturer of walk-in coolers and freezers. Services include installation, repairs and project management

#### **Kysor Warren**

Kysor Warren is a leading brand of refrigerated display cases and refrigeration systems for supermarkets throughout North America from Heatcraft Worldwide Refrigeration. Built on a tradition of excellence, the Kysor/Warren brand has been a part of the commercial refrigeration industry for more than 125 years. Operating two manufacturing facilities in Columbus, GA, Kysor/Warren is a leader in developing innovative and sustainable refrigeration technologies.

# Energy & Store Development Conference E+SD 2014

St. Louis Union Station Hotel

## **LG Electronics USA**

LG Electronics, the world's #1 AC manufacturer, presents its air conditioning and energy efficiency solutions for national key account customers. Learn how LG's Variable Refrigerant Flow (VRF) heating and cooling technology and LED lighting can support your energy efficiency projects while improving project ROI. LG is committed to partnering with our customers to improve your ability to generate savings and exceed energy efficiency goals.

## **Lighting Solutions, Inc.**

Lighting Solutions, Inc. is a full-turnkey, design-build lighting retrofit ESCO focused on the supermarket industry. We have designed and completed retrofit projects in over 900 store locations for Hannaford, Stop & Shop/Giant, Weis Markets, King Kullen and many others; reducing energy and maintenance costs and improving lighting quality.

## **Manomet**

The Manomet Grocery Stewardship Certification (GSC) is a practical, proven environmental certification program to help grocery store leadership reduce their environmental footprint through continuous improvement and employee engagement. This comprehensive system is based on Manomet's Sustainability Workbook for Grocers, designed to assist store managers in systematically managing and reducing their store's environmental footprint.

## **Mueller Refrigeration**

Mueller Refrigeration is a global leader in the design and manufacture of premium-performance commercial HVAC/R valves, pressure vessels, and protection devices. We specialize in offering solutions to the most complex applications with products that exceed industry standards. In-house Engineering and Lab capabilities allow us to continuously deliver innovative products to the markets we have served for nearly a century. Visit [www.muellerindustries.com](http://www.muellerindustries.com); [www.muellerrefrigeration.com](http://www.muellerrefrigeration.com); or [www.westermeyerind.com](http://www.westermeyerind.com).

## **Munters Corporation**

Munters equipment utilizes energy recovery and humidity control technology that cuts energy costs, ensures food and customer safety, and provides the proper amount of fresh, healthy outdoor air at the precise temperature and humidity necessary. Stores enjoy higher sales and lower operating costs when providing a more efficient, high-performance HVAC system.

# Energy & Store Development Conference E+SD 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **National Refrigerants, Inc.**

National Refrigerants, Inc. is an international leader in the packaging and supply of refrigerant gases and refrigeration oils. NRI is dedicated to all aspects of refrigerant management including refrigerant and oil packaging, DOT requalification and refurbishment of compressed gas cylinders and containers, refrigerant reclamation and refrigerant and oil laboratory analysis.

## **NDL Industries, Inc.**

NDL ACR copper fittings have become known for their quality of finish, perfect fit and competitive pricing. Additionally, they are approved for R410 and CO2, and are preferred by contractors in major projects for well-known retail chain stores and supermarkets. NDL ACR Copper Fittings Series with increased weight is especially designed to be use in commercial refrigeration & HVAC systems. Moreover, NDL ACR Copper Fitting Series is manufactured to exceed the ASME B 16.22 Standard, sizes are marked on fittings, and packaging includes poly-bagging.

## **Noble Americas Energy Solutions**

As one of the nation's top retail energy marketers, Noble Americas Energy Solutions (NAES) supplies natural gas and electricity to commercial and industrial customers in all deregulated markets. Our suite of product offerings and sophisticated risk management programs are flexible and designed to meet the unique needs of our customers.

## **Novar**

Novar, a Honeywell company, has been reducing energy cost and protecting food quality for many of the world's largest grocery retailers for over 20 years. Novar's Opus™ family of control and energy management products deliver industry-leading open architecture, integrated Refrigeration, HVAC, Lighting and Metering solutions for multi-site supermarket chains.

## **Outsmart Power Systems**

Control systems for your grocery stores are essential...but they can't tell you whether your store is optimized or how to improve performance. OutSmart's intelligent, low-cost solution provides a metric-driven approach that optimizes energy and equipment - giving you specific information to save money and avoid downtime.

## **Polar Technology**

For over 20 years, Polar Technology has built a reputation in responsible refrigerant reclamation and recovery. From that history the refrigerant management solution called TrakRef® was created. TrakRef®, is a cloud-based SaaS solution that connects all stakeholders involved, maximizes the value of refrigerant, and creates sustainable growth for customers.

# Energy & Store Development Conference **E+SD** 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **PowerSecure**

PowerSecure is a leading provider of Interactive Distributed Generation and LED lighting solutions to retail. Our Interactive Distributed Generation power systems deliver efficient on-site power during peak-demand periods and protect businesses with backup power. PowerSecure Lighting is a market-driven manufacturing company, passionate about improving environments through innovative LED solutions.

## **Promolux+Econofrost**

Promolux offers LED and lighting solutions for fresh food and retail merchandising applications through balanced color, custom sizing, lumen output, ingress protection, beam angles, and choice of power sources for built-in and retrofit installations. Econofrost retractable night covers offer protection of perishables and energy conservation in open refrigerated display cases through the use of heat reflective fabric, easy-to-install and durable blinds for built-in and retrofit installations.

## **QM Power, Inc.**

QM Power is commercializing the most efficient, reliable, cost-effective and power-dense electric motor, generator and actuator technologies for the commercial refrigeration, HVAC, electric vehicle, automation and power generation markets.

## **Remis America LLC**

REMIS America offers retro-fit refrigeration doors and freezer covers to grocery Retailers and OEM case manufacturers that cut energy costs up to 80%. REMIS America's full range of insulated glass doors and bunker covers suit any supermarket style. These eco-friendly systems are unrivaled in keeping energy consumption low.

## **Resource Data Management USA Inc.**

Resource Data Management (RDM USA Inc) provides market-leading design and manufacturing of open protocol IP based controls for Refrigeration, HVAC, Lighting, racks, transcritical CO<sub>2</sub>, case, circuit controllers and freely programmable devices. Part of a global distribution network in North America, Europe and Asia also providing web-accessed monitoring services.

## **RetroCool Energy, Inc.**

RetroCool Energy provides cooling-related energy conservation services to supermarkets. RetroCool utilizes a number of energy savings technologies. Our proprietary technology is RetroMist, a system that converts air-cooled condensers to evaporative. In doing so, peak ambient cooling capacity is increased while water use and energy usage is decreased.

# Energy & Store Development Conference E+SD 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **Seasons4, Inc.**

Seasons-4 is a manufacturer of specialty dehumidifying, heating, ventilating and air-conditioning (HVAC) equipment. Our strength is our ability to design and build specialized HVAC equipment for a wide variety of customers. Our engineering design, technology and flexible manufacturing allows us to create unique HVAC equipment for hatcheries, plastics manufacturing, natatoriums, food processing, supermarkets, schools, and ice rinks. Specifically, Seasons-4 has over 6000 supermarket installations.

## **Source Refrigeration & HVAC, Inc.**

Source Refrigeration & HVAC is the leading independent provider of commercial refrigeration and HVAC services in North America, serving the nation's top supermarket chains, many of the largest convenience store chains, and leading telecom and industrial companies. With over 1200 employees and service locations nationally, Source designs, installs, services, maintains and optimizes mission-critical refrigeration and HVAC systems.

## **Southern CaseArts**

At Southern, we design and manufacture innovative refrigerated, non-refrigerated, and heated merchandisers that produce excellent results. Our goal is to partner with forward-thinking clients whose objective is to increase their sales per square foot. As consumers expect more, our merchandisers for fresh foods like sandwiches, salads, pastry, etc., can make your store a meal center destination.

## **Spectronics Corporation**

Spectronics Corporation invented fluorescent leak detection in 1955, and remains the undisputed world leader in the technology. Our specialized leak detection dyes, inspection lamps and diagnostic tools are designed to find all leaks in any type of industrial, refrigerant, synthetic or petroleum-based fluids, fuel and water systems, quickly and effortlessly.

## **Sporlan Division – Parker Hannifin**

Sporlan Division—Parker Hannifin is the leading manufacturer of HVACR control solutions with quality products, commitment to innovation, manufacturing excellence, superior service and support for our customers. Solutions include: Enterprise Energy Management and Control Systems (Micro Thermo Technologies™), electronic stand-alone solutions, Catch-All® filter-driers, thermostatic expansion valves, solenoids and pressure regulating valves.

## **Structural Concepts Corporation**

Structural Concepts manufactures merchandising systems that will transform your perishable departments into an eye-popping presentation of fresh food. Unrivaled temperature integrity, ease of installation, rugged durability and reliable low cost operation are essential elements of our product design. Let us show you high-performance solutions to your merchandising needs.

# Energy & Store Development Conference **E+SD** 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **Sunoptics – an Acuity Brands Company**

Sunoptics designs and manufactures prismatic skylights and daylighting delivery systems that harness the power of the sun to maximize the cost-effective energy savings of daylighting. Our prismatic lenses provide maximum light transmittance with 100% diffusion, to eliminate undesirable hot spots, glare and UV damage.

## **Supermarket Energy Technologies**

Since 1996, Supermarket Energy Technologies has been the premier, one-stop retrofit energy-efficiency expert for the grocery, convenience and drug store industries. We offer OEM and retrofit applications of our proprietary and patented energy conservation applications, solutions, installations and support services. Our products include Anti-Sweat Heater Controls, Night Covers, Glass Display Doors, ECMs, Evaporator Fan controls, LED and Site Lighting solutions, and more. All applications are available for demonstration, measurement and validation within our technology center.

## **Supermarket Environment Services Co. (SESCO)**

Supermarket Environment Services Co. (SESCO) is a HVAC, energy management and commissioning company serving supermarket owners and executives for store development, renovation, construction, and maintenance. SESCO specializes in reducing energy and maintenance operating costs by combining HVAC systems sales with services like criteria engineering, Certified Energy Management, and commissioning.

## **Supermarket Parts Warehouse**

Supermarket Parts Warehouse offers same-day shipping and 30%-80% savings on direct replacement parts for all major OEM Case Manufacturers. Energy-efficient products with great pricing include LED Lighting, EC Motors, Fan & Anti-Sweat Controls, and more. SMPW has it all for less hassle and at a significant cost savings.

## **Systems LMP**

Systemes LMP is the most adaptable Transcritical refrigeration solution on the market. Our technology can be engineered, manufactured and adapted to meet the needs of your supermarket, agribusiness, refrigerated warehouse or ice rink. The efficiency and performance of our systems has been awarded multiple Platinum Green Chill certifications. We have technologies that can help implement transcritical solutions in all the southern states.

# Energy & Store Development Conference E+SD 2014

September 7-10, 2014 • St. Louis, MO  
St. Louis Union Station Hotel

## **Temprite**

High-efficiency Temprite coalescent and conventional oil separators are engineered to reduce carbon emissions and lower energy costs. Temprite separators are compatible with money-saving natural refrigerants. The 130 Series of coalescent separators are designed for transcritical CO<sub>2</sub> applications. 920 and 920R Series separators are compatible with both ammonia and subcritical CO<sub>2</sub> systems.

## **Therma-Stor LLC**

Therma-Stor is the leading manufacturer of Heat Reclaim Water Heaters for the supermarket industry. Therma-Stor Heat Reclaim Water Heaters reduce operating costs by lowering natural gas or electrical consumption for water heating as well as increasing the efficiency of the refrigeration system.

## **Transformative Wave**

Transformative Wave is based in Kent, WA and is one of the country's leading innovators in energy efficiency technology. It continues to develop and bring to market a growing line of energy-saving and environmentally responsible products and services including the CATALYST and eIQ Platform.

## **US Department of Energy**

The Better Buildings Alliance is a U.S. Department of Energy effort to promote energy efficiency in U.S. commercial buildings through collaboration with owners, operators, and managers. Members commit to addressing energy efficiency in their buildings by setting goals, developing efficiency resources, and adopting advanced cost-effective technologies and market practices.

## **US Green Building Council**

The U.S. Green Building Council (USGBC) and its community are changing the way buildings and communities are designed, built and operated. Better buildings are our legacy. USGBC is committed to a prosperous and sustainable future through cost-efficient and energy-saving green buildings, and works toward its mission of market transformation through its LEED for Retail green building program, robust educational offerings, a nationwide network of chapters and affiliates, the annual Greenbuild International Conference & Expo, and advocacy in support of public policy that encourages and enables green buildings and communities.

## **Veris Industries**

Veris Industries is a premier provider of environmental sensors and energy management solutions. Known for providing easy-to-use labor-saving products - whether it's a humidity sensor for monitoring anti-sweat of meat and deli cases, a temperature sensor for help in climate control, or a power meter for energy use management - Veris Industries has the ideal product to meet your needs.

**Verisae, Inc.**

Verisae is a cloud-based software company enabling businesses focused in grocery, convenience stores, specialty retail, banking, telecommunications, utility, and food service to manage facility maintenance, energy, and sustainability programs across distributed enterprises. Our SaaS solutions are simple, integrated, mobile, and operate on an open API technology platform – ‘The Connected Facility.’ Using analytics and fact-based decisions, Verisae’s clients improve their customer satisfaction, reduce operating costs, and increase profits. The growing Verisae network creates one of the largest global networks of its kind.

**Zero Zone Inc.**

Zero Zone, Inc. is a leading manufacturer of commercial refrigeration systems and refrigerated glass-door display cases for supermarkets, drug, dollar and convenience stores. Established in 1961, Zero Zone has manufacturing facilities in North Prairie and Waukesha, Wisconsin, and in Ramsey, Minnesota—all dedicated to providing responsive service to food retailers.
