PEOPLE | PROPERTY | REPUTATION

# LEADING PEOPLE TO SAFETY

*By: Robert Foster, Vice President, Marketing and Communications*

**TUCKER**  
SAFETY PRODUCTS INC.

THE VOICE OF FOOD RETAIL 

# Leading People To Safety

- *Don't Get Stuck in the Past*
- *Make Your Aim Execution*
- *Design your Safety and Asset Protection Platform as a Blueprint for Evolution*

# Don't Get Stuck in the Past

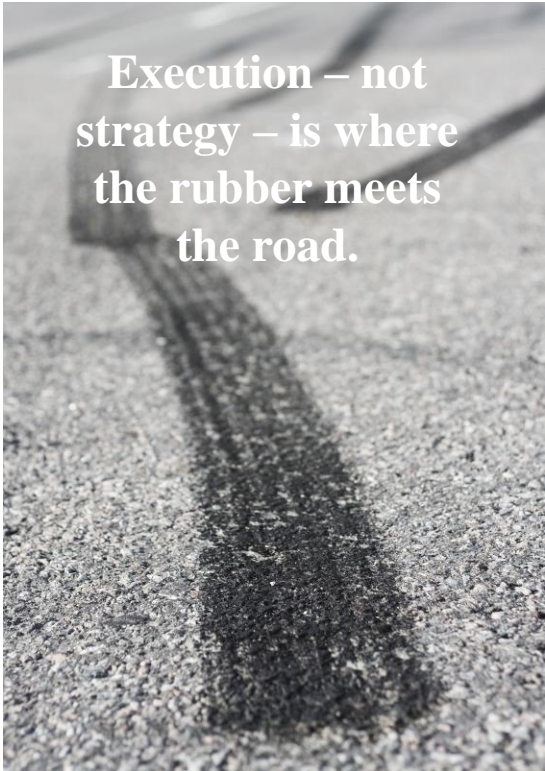

- *Think differently* inside the box!
- Don't be *chained to historical rules* of safety
- Safety Strategy needs to be *Disruptive and Adaptive*
- Long-term *value* is not created in straight lines

# Execution - Getting It Done

- Safety and asset protection efforts *get real* when the aim is execution
- Execution is about *exposing reality and acting on it!*
- Historical safety programs *have little to do* with the reality of execution.

Execution – not  
strategy – is where  
the rubber meets  
the road.

# Blueprint for Evolution

- Don't paint yourself *into a corner*
- A place to “launch for *consistent interpretation*”
- Well-designed safety *platforms evolve and grow*

VS.

# HOW CAN YOU ACHIEVE THIS?

- *Make it matter*
- *Make it simple*
- *Make it stick*
- *Make it Pay*

PEOPLE | PROPERTY | REPUTATION

*Make it Matter...*

THE VOICE OF FOOD RETAIL 

## Make it Matter

- Engage entire organization – top to bottom
- Don't just copy other safety programs
- Avoid Safety Roulette
- Create a sense of winning!

*Don't fall into the trap that safety doesn't matter until it does!*

## MAKE IT MATTER ENGAGEMENT

- Share information freely
- Nothing is secretive when it comes to protecting people and your business
- Pull people in – you know, the actual people doing the work!

## Make it Matter Don't Copy, Lead!

- Off-the-shelf programs *rarely work!*
- When you copy other safety programs *you skip understanding* how safety / asset protection should work for *YOUR* organization
- When you copy, you are always in the passive position, *you never lead.*

## MAKE IT MATTER AVOID SAFETY ROULETTE

- *Safety is #1* – or is it profit? Your employees?  
Your Customers?
- Safety...
  - *is customer service*
  - *is profitability*
  - *is a business priority*

# Make it Matter

## Winning at Safety

- Winning *is not* the absence of failure; safety and asset protection *is not* the absence of injury or loss.
- Determine *what winning looks like* in safety and asset protection in your organization
- Create a *sense of winning* beyond zero injuries / loss
- *Change* people's idea of what they can do as an individual, as a company, and their idea of themselves.

PEOPLE | PROPERTY | REPUTATION

*Make it Simple...*

THE VOICE OF FOOD RETAIL 

# Make it Simple

- Integrated (*where it makes sense*)
- Put safety / asset protection platform *in operational terms*
- Get *rid* of things that don't work
- Smart *design!*

# MAKE IT SIMPLE

## INTEGRATION / SYSTEM-BASED

- A healthy and safe work environment must be *incorporated into the fabric* of daily operations.
  - *Safety / AP needs to join quality, productivity, customer focus and profitability as “the way business is done”*
- Adopt a *systematic/system-based approach* to safety and asset protection
- Safety / AP Platform *must reflect* fundamental belief that *keeping team members safe from injury* is not negotiable.

## MAKE IT SIMPLE PUT IN OPERATIONAL TERMS

- The working environment is *complex, dynamic and demanding*; Your teams are making decisions constantly.
- Translate your Safety / AP platform into operational terms or *it won't get done!*

“  
What one does easily, one does well.  
- Andrew Carnegie

# Make it Simple

## Get Rid of Things That Don't Work

- What you *need* versus what you *want*
  - # of checklists
  - Content / Materials
  - Required forms / documentation
  - # of steps
- Keep it *simple* to achieve execution!
- Increase *effectiveness and knowledge* – not steps or SOPs.

# MAKE IT SIMPLE SMART DESIGN

- *Informed* decision making / *knowledge* of risks
- Build Safety / AP platform to be *relevant to* business and team members' *desires and needs*.
- Every organization *is different*; A *one-size-fits-all* approach is simply *ineffective*.
- Do not lose sight of what your Safety / AP Platform will be like – *experientially, aesthetically, visually and functionally*.

PEOPLE | PROPERTY | REPUTATION

*Make it Stick...*

THE VOICE OF FOOD RETAIL 

# Make it Stick

- Safety *Effort* + *Supportive* Communication
- Keep it *interesting*!
- Telling *isn't* training
- *Habitual* Safety

We Are  
What We  
repeatedly do.  
**EXCELLENCE,**  
Therefore,  
is not an act,  
**BUT A HABIT**  
- Aristotle -

*The first requirement of effective communication is getting attention, the second is keeping it. [Made to Stick, Dan Heath]*

# MAKE IT STICK

## SUPPORTIVE COMMUNICATION

- Both parties *enhanced* by the exchange
- People identify themselves as *part of the solution*, not the source of the problem
- Communicating knowledge *is a greater challenge* than possessing knowledge
- Take an *inclusive* approach
- Aim is *productive* dialogue / communication

*Three types of conversations: everyone talks and nobody listens - one person talks and others listen - no one talks and everyone listens.*

## MAKE IT STICK KEEP IT INTERESTING

- Interest *keeps* attention!
- Place an idea or thought at the front of a person's mind by *making the concern active*.
- Common sense is the *enemy* of sticky messages
  - *People won't obsess over remembering something they intuitively already get*
- Fire people up! *Engage them* – let them in.

# Make it Stick

## Telling Isn't Training

- Telling is *not the same* as actually training
- Provide rationale – knowing *why I should learn about safety / AP* and valuing it increases the probability of real learning.
- Can't just add water to your Safety / AP platform: Training is not only necessary, it *creates options*.
- Train to ensure safety practices and understanding of risks *stays with people* no matter where they go in the organization.

# MAKE IT STICK

## HABITUAL SAFETY

- It's personal!
  - *Taking personal responsibility has a stronger impact on safety performance*
- Involve your team *in their own* safety management
  - *Best way to ensure rules / steps are ignored is to leave your team out of the process*
- We're creatures of habit – fill the day with *positive safety habits* or negative ones creep in.

PEOPLE | PROPERTY | REPUTATION

*Make it Pay...*

THE VOICE OF FOOD RETAIL 

## Make it Pay

- Invest in people and safety!
- Stop doing things that don't work
- Get Trendy [data trendy]

*What would it mean to your bottom line if you reduced safety-related / AP-related losses by 20%, 30%, 40% or more?*

# MAKE IT PAY

## INVEST IN PEOPLE AND SAFETY

*R*eturn  
*O*n  
*I*nvestment

*It's not only the right thing to do, it's the profitable thing to do.*

- Safety / AP *impact the bottom line*. Period.
- You can actually *cut costs by investing* in people and safety!
- Are you *investing* in Safety / AP or just *spending* money?
- Safety / AP *cannot be separated* from productivity and cost.

## MAKE IT PAY PAY YOURSELF FIRST!

- Taking risks is a business necessity; but taking risks with the safety and health of your team *is not worth the gamble.*
- Injuries are *preventable*; for every dollar spent on prevention, you can expect *up to six times ROI* (OSHA)
- Direct *correlation between* a company's performance in safety and its productivity and profits.
- Safety / AP platform promotes positive brand image and helps *retain talent.*

# MAKE IT PAY GET TRENDY!

- Simply observing and correcting is a *Band-Aid solution* that won't address root causes.
- Dedicated *smart analysis* can be like looking into your Safety / AP crystal ball.
- Use *data trends* to determine where you are today, where you want to be, and how you will get there.
  - *Key: data to insights, but more importantly – insights to action!*
- *Communicating safety / AP data and insights* is just as important as collecting it!

PEOPLE | PROPERTY | REPUTATION

*C.A.R.E.*

## Show Real Caring...

- Connect
- Appreciate
- Respect
- Everyone

## C.A.R.E.

## BECAUSE IT IS THE RIGHT THING TO DO

- There is a link between “satisfied workers” and satisfied customers:
  - *They are not mutually exclusive*
- The customer experience will never exceed that of the employee experience.
- If you disregard the *importance of connecting* with your teams, you lose the benefit of a dedicated, long-term team.
- *Higher engagement → More Focus → Fewer Mistakes → Better Safety Outcomes*

*“...in one company, engaged employees were five times less likely to have a safety incident and seven times less likely to have a safety incident involving lost time.*

*Thank You!*
